Introducing NIA Token

KoinoNIA earns from successful exits

When startups and private equities that raise with KoinoNIA later sell or go public, KoinoNIA earns cash based on predetermined carried interest rates or commissions.

NIA Token receives dividends

We pay out a share of profits from successful exits that we receive to NIA Token holders proportional to how many tokens you own.

You share in the profits

NIA Token will be a tradeable and dynamic profit-sharing token. The upside of KoinoNIA harnessed a powerful new asset.

Benefits of Using KoinoNIA Platform

KoinoNIA marketplace makes it easy to explore private growth companies, access investment opportunities and find liquidity.

TOKENIZATION

KoinoNIA issues tokens that represent startup equity. Leveraging on blockchain technology represents the most secure and transparent way to invest in startups.

SECONDARY MARKET

After a startup's crowdfunding campaign is closed, KoinoNIA's secondary market allows investors to continue buying shares.

BLOCKCHAIN BASED

Unlike physical currencies, blockchain cryptocurrency works on digital channels and are often adhered to strong cryptography to secure financial transactions that happen online.

PLATFORM SUCCESS

KoinoNIA earns a 2% commission from every company it raises capital for. In the event of an exit, 100% of the proceeds it earns from that commission are distributed to NIA Token holders.
